

2019 SHELBY GT-S

Supercharge your rental experience with the special edition Shelby GT-S Mustang, exclusively available at selected SIXT rent a car locations.

Twenty Shelby GT-S sports cars will be built by Shelby American at its Las Vegas facility for rental in the summer of 2019. Each fastback will be powered by a supercharged 5.0L V8 and 10 speed automatic transmission. Shelby tailored the suspension to maximize the car's capabilities without sacrificing ride quality. The Brembo brakes have impressive stopping power to match the Shelby's amazing power. The exterior features proprietary bodywork, SIXT badges and stylish new wheels, while Shelby touches can be found throughout the interior. Many of the components were developed specifically for SIXT's Shelby GT-S program.

Once the cars are retired from rental duty, they will be available for purchase and the new owners can return their Shelby GT-S to the factory for further enhancements.

Individuals interested in renting a Shelby GT-S Mustang please visit www.SIXT.com.
